

# AquaVac® 500

ROBOTIC CLEANER

Scrubs, vacuums pool floor, coves, walls and waterline with computer efficiency.

The new AquaVac 500 comes equipped with a microprocessor that determines the most efficient cleaning path possible. Pool owners simply select the cleaning frequency that best matches their pool debris load and AquaVac 500 gets to work with dual powerful scrub brushes that scrub and vacuum the pool floor, coves, walls and waterline.

## Low-profile cleaning. High-profile results.

### AquaVac 500 features and benefits:

- Scrubs and vacuums pool floor, coves, walls and waterline in 3 hours
- Dual Mode bottom only (90 minutes) or Full Cycle bottom and wall (3 hours) cleaning cycles
- Easy top-access extra-large debris container, no turning over the cleaner
- 2 Ultrafine porosity filter elements for quick and easy clean—no messy bags
- Integral timer—clean your pool every 24, 48 or 72 hours
- Cord swivel minimizes tangling
- Out-of-Water Sensor prevents the cleaner from starting up when out of the pool
- Beach Entry Sensor detects when the cleaner is climbing out of the pool and reverses direction
- For residential pools up to 20' x 40'

Power Supply With  
Integral Timer

Anti-Tangling  
Cord Swivel

Part Number	Description
RC3431CTY	AquaVac 500 with Caddy Cart, Power Supply Control and Timer and Cord Swivel

Optional Accessory:  
Spring Clean-Up Filter Element  
Model RCX70101

Filter removes easily  
from filter frame

Caddy Cart
