

SUPERMAX® VS

VARIABLE SPEED PUMP

Pump up to 80%* energy savings back into your pocket.

SuperMax VS pumps bring the remarkable energy cost savings of variable speed technology to standard pools at an affordable price. They slash energy costs by up to 80%* while helping to keep your pool sparkling clean and inviting. SuperMax VS pumps come to you from the trusted leader that launched variable speed technology to the swimming pool industry years ahead of every other pump manufacturer. No wonder we still outsell all other variable speed pumps. The SuperMax VS pump is easy to install. Its advanced digital display also makes it easy to use, and unlike others, you don't have to buy and install a separate timer.

*Savings based on variable speed pump compared to a single-speed pump running 12 hours per day at an average of \$0.16 per kWh in a 20,000 gallon pool. Actual savings may vary based on local utility rates, pool size, pump run time, pump horsepower, pump rpm, plumbing size and length, pump model, service factor and other hydraulic factors.

SUPERMAX® VS VARIABLE SPEED PUMP

Easy to install. Easy to operate.

For pool owners who want to step-up to the energy savings of variable speed technology, the SuperMax VS pump is the wise choice. It will save up to 80% on operating energy costs versus standard single-speed pumps*. And the SuperMax VS pump is engineered for easy installation, simple operation, and trouble-free service.

KEY FEATURES

- Only variable speed pump on the market today with 110/230 volt capability.
- 50/60 Hz single phase.
- Costs significantly less to operate because its variable speed technology moves water more efficiently at lower speeds.
- Ideal for standard pools requiring up to 1.5 hp pump.
- Affordable for new and standard pool pump replacement applications.
- Simple, intuitive user interface displays watts, RPM, current time and remaining program duration. Easy-to-read display makes programming and monitoring a cinch.
- Easy-to-access electrical connections for simple installation. Wiring is easy and unlike other pumps, the electronic board is not exposed to exterior elements at installation.
- Direct...and superior drop-in replacement for the Hayward® Super Pump®.
- UL 60730 Compliant.
- Ultra-quiet TEFC motor.
- Three operating speed settings plus override capability.
- Real-time, 24-hour clock; no need to install a separate external unit.
- Tough, engineered polymer pump body and durable, totally enclosed fan cooled (TEFC) motor give years of trouble-free service.
- WEF [5.9](#) THP [2.2](#)
