

Technologically advanced for the ultimate in comfort.

H-Series

ELECTRONIC AND MILLIVOLT HEATERS

SPECIFICATIONS AND DIMENSIONS

Millivolt Heaters

	H250	H200	H150
BTU/Hr.	250,000	200,000	150,000
Width (Inches)	27"	24½"	21½"
Depth (Inches)	27½"	27½"	27½"
Height (Inches)	28½"	28½"	28½"
Water Connections	1½" x 2"	1½" x 2"	1½" x 2"
Heat Exchanger	Cupro Nickel	Cupro Nickel	Cupro Nickel
Indoor Vent Pipe Diameter (Inches)	7"	7"	6"
HWS Stack Height (Inches)	17¼"	15¼"	14"
Heater Weight (lbs.)	144	141	131
Gas Connection at Heater	¾"	¾"	¾"

H-Series heaters are available in a comprehensive range of BTU sizes for natural or propane gas. All units are certified by the Canadian Standards Association and carry Hayward's exclusive warranty.

Electronic Heaters

	H250ED2C	H250PED2C	H150PED2C	H150ED2C
BTU/Hr.	250,000	250,000	150,000	150,000
Weight (lbs.)	198	198	155	155
Gas Type	Natural	Propane	Natural	Natural

ENVIRONMENTAL

Low NOx Emissions

Environmentally responsible and complies with California air quality emission standards.

PERFORMANCE & VALUE

Superior Hydraulic Performance

Industry-leading hydraulic performance saves energy by reducing circulation pump run time.

H-Series Millivolt Heaters

Although designed for budget-conscious applications, Hayward H-Series Millivolt heaters deliver uncompromising performance and economy. A standing pilot ignition system ensures reliable lighting, and – like all H-Series heaters – they feature a Cupro Nickel Finn Plate heat exchanger and Fire Tile combustion chamber. Available in your choice of propane or natural gas models.

- A standing pilot ignition system ensures reliable lighting
- Corrosion-resistant Finn Plate heat exchangers with cupro nickel and Fire Tile combustion chambers
- Available in your choice of propane or natural gas

H-Series Electronic Heaters

Hayward H-Series Electronic heaters deliver exceptional performance and economy. An electronic ignition system ensures reliable lighting, and – like all H-Series heaters – they feature a Cupro Nickel Finn Plate heat exchanger and Fire Tile combustion chamber. An easy-to-read LED control panel provides digital temperature readout and diagnostics for quick identification of components that might need service. Available in your choice of propane or natural gas models.

- Stainless steel burners
- Corrosion-resistant Finn Plate heat exchangers with cupro nickel and Fire Tile combustion chambers
- Choose from propane or natural gas operation
